

Catalyst™ Platform Demo

Updated 12/18/2020

The Catalyst™ platform is participants' home base for ongoing DiSC® learning—in class and out of it. Part of facilitating successful *Everything DiSC® on Catalyst™* sessions includes showcasing the Catalyst platform and guiding participants to key content. You have the option to do this using the Catalyst demo, which features a fictitious organization with colleagues of various DiSC styles. Log in to the Catalyst demo during your session and share your screen to:

- Demonstrate accessing pages needed for activities during the session
- Encourage independent exploration by recommending Catalyst content for participants to review after the session

Use these login credentials to access the Catalyst demo:

URL: catalyst.everythingdisc.com

Email: mateo@everythingdisc.com

Password: CatalystDemo123!

A few important notes:

- Only Authorized Partners and *Everything DiSC on Catalyst* kit holders are permitted to use the Catalyst demo environment. You should not share these login credentials with anyone.
- We may change these login credentials from time to time to ensure security and restrict access to this environment. Check back here for updates.
- Because the demo experience is an extension of the live Catalyst platform, you may occasionally receive feedback requests while using the demo. To ignore these, simply close the message and continue with your session.
